SECURITIES AND EXCHANGE COMMISSION**
Washington, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended June 30, 2014

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

Commission file number 001-35003

RigNet, Inc.

(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

1880 S. Dairy Ashford, Suite 300
Houston, Texas
(Address of principal executive offices)

76-0677208
(I.R.S. Employer
Identification No.)

77077-4760
(Zip Code)

(281) 674-0100
Registrant's telephone number, including area code

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definition of "large accelerated filer," "accelerated filer," and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer
Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).
Yes No

At July 31, 2014, there were outstanding 17,617,638 shares of the registrant's Common Stock.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Note 1 – Basis of Presentation

The interim unaudited condensed consolidated financial statements of RigNet, Inc. (the Company or RigNet) include all adjustments which, in the opinion of management, are necessary for a fair presentation of the Company's financial position and results of operations. All such adjustments are of a normal recurring nature. These financial statements have been prepared in accordance with accounting principles generally accepted in the United States for interim financial information and Rule 10-01 of Regulation S-X. The preparation of these financial statements requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying footnotes. Estimates and assumptions about future events and their effects cannot be perceived with certainty. Estimates may change as new events occur, as more experience is acquired, as additional information becomes available and as the Company's operating environment changes. Actual results could differ from estimates. These statements should be read in conjunction with the audited consolidated financial statements for the year ended December 31, 2013 included in the Company's Annual Report on Form 10-K filed with the Securities and Exchange Commission on March 7, 2014.

Significant Accounting Policies

Please refer to RigNet's Annual Report on Form 10-K for fiscal year 2013 for information regarding the Company's accounting policies.

Recently Issued Accounting Pronouncements

In February 2013, the FASB issued Accounting Standards Update No. 2013-02 (ASU 2013-02), Comprehensive Income (Topic 220): Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income. This update amends Accounting Standards Updates Nos. 2011-05 and 2011-12. This update requires the presentation of the components of amounts reclassified out of accumulated other comprehensive income either on the face of the statement of income or in the notes to the financial statements. The Company adopted ASU 2013-02 as of January 1, 2013. The adoption of ASU 2013-02 did not have any impact on the Company's condensed consolidated financial statements.

In July 2013, the FASB issued Accounting Standards Update No. 2013-11 (ASU 2013-11), Income Taxes (Topic 740): Presentation of an Unrecognized Tax Benefit when a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists. This update defines the criteria as to when an unrecognized tax benefit should be presented as a liability and when it should be netted against a deferred tax asset on the face of the balance sheet. ASU 2013-11 is effective for fiscal years beginning after December 15, 2013. The Company adopted ASU 2013-11 as of January 1, 2014. The adoption of ASU 2013-11 did not have any impact on the Company's condensed consolidated financial statements.

In May 2014, FASB issued Accounting Standards Update No. 2014-09 (ASU 2014-09), Revenue from Contracts with Customers (Topic 606). The core principle of this amendment is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. ASU 2014-09 is effective for annual reporting periods beginning after December 15, 2016, including interim periods within that reporting period, with earlier adoption not permitted. ASU 2014-09 can be adopted either retrospectively to each prior reporting period presented or as a cumulative-effect adjustment as of the date of adoption. The Company is currently in the process of evaluating the impact the adoption of ASU 2014-09 will have on the Company's condensed consolidated financial statements.

Note 2 – Business Combinations

Inmarsat's Enterprise Energy Business Unit

On January 31, 2014, RigNet closed the acquisition of Inmarsat Plc's Energy Broadband Operations (Inmarsat) for an aggregate purchase price of \$26.1 million, including \$12.3 million of working capital. Of this aggregate purchase price, RigNet has paid \$23.3 million to Inmarsat with the additional \$2.8 million paid to Inmarsat in July 2014. Under the terms of the deal, Inmarsat sold to RigNet substantially all of its energy broadband assets, which include: microwave and WiMAX networks in the U.S. Gulf of Mexico and the North Sea serving drillers, producers and energy vessel owners; VSAT interests in the United Kingdom, U.S. and Canada; an M2M SCADA VSAT network in the continental U.S. serving the pipeline industry; a telecommunications systems integration business operating worldwide; and a global L-band MSS retail energy business.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

The assets and liabilities of Inmarsat's Enterprise Energy business unit have been recorded at their estimated fair values at the date of acquisition. The Company's allocation of the purchase price is preliminary as the amounts related to working capital, long-lived assets, identifiable intangible assets, and the effects of income taxes resulting from the transaction, are still being finalized. Any material measurement adjustments will be recorded retroactively to the acquisition date.

	<u>Weighted Average Estimated Useful Life (Years)</u>	<u>Fair Market Values</u> (in thousands)
Current assets		\$ 24,130(a)
Property, plant and equipment		8,948
Identifiable intangible assets:		
Backlog	2	\$1,800
Licenses	7	2,000
Customer relationships	7	240
Total identifiable intangible assets		4,040
Other assets		760
Liabilities		(11,795)(a)
Total purchase price		<u>\$ 26,083(a)</u>

(a) Subject to customary working capital adjustments.

RigNet financed the transaction with the credit facility announced on October 3, 2013 and existing cash on hand (see Note 6—Long-Term Debt).

For the three and six months ended June 30, 2014, RigNet has spent \$0.6 million and \$2.9 million, respectively, on acquisition-related costs, which are reported as general and administrative expense in our Condensed Consolidated Statements of Comprehensive Income.

Actual and Pro Forma Impact of the Inmarsat's Enterprise Energy Business Unit Acquisition

Inmarsat's Enterprise Energy business unit revenue and net income included in the Condensed Consolidated Statements of Comprehensive Income for the three and six months ended June 30, 2014 are presented in the following table. These amounts represent operations commencing immediately after the acquisition, February 1, 2014, through the end of the period (in thousands):

	<u>Three Months Ended June 30, 2014</u>	<u>Six Months Ended June 30, 2014</u>
Revenue	\$ 19,192	\$ 32,910
Net Income	\$ 926	\$ 1,147

For the three months ended June 30, 2014 and 2013, RigNet's supplemental pro forma revenue was \$80.7 million and \$69.6 million, respectively, and for the six months ended June 30, 2014 and 2013, RigNet's supplemental pro forma revenue was \$161.4 million and \$140.6 million, respectively, calculated as if the Inmarsat's Enterprise Energy business unit acquisition had occurred on January 1, 2013.

RigNet has not disclosed supplemental pro-forma earnings for the three and six months ended June 30, 2014 and 2013 as there is no practicable method to calculate pro-forma earnings. After making every reasonable effort, RigNet was unable to retrospectively allocate indirect costs, including over-head to the assets that were purchased in the asset carve out. To do so would require RigNet to make assumptions about the intents of the management of Inmarsat's Enterprise Energy business unit prior to the acquisition which cannot be independently substantiated. Such retrospective application requires significant estimates of amounts, and it is impossible to distinguish objectively information about those estimates.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Note 3 – Business and Credit Concentrations

The Company is exposed to various business and credit risks including interest rate, foreign currency, credit and liquidity risks.

Interest Rate Risk

The Company has significant interest-bearing liabilities at variable interest rates which generally price monthly. The Company's variable borrowing rates are tied to LIBOR resulting in interest rate risk (see Note 6 – Long-Term Debt). The Company does not currently use financial instruments to hedge these interest risk exposures, but evaluates this on a continual basis and may put financial instruments in place in the future if deemed necessary.

Foreign Currency Risk

The Company has exposure to foreign currency risk, as a portion of the Company's activities are conducted in currencies other than U.S. dollars. Currently, the Norwegian kroner and the British pound sterling are the currencies that could materially impact the Company's financial position and results of operations. The Company's historical experience with exchange rates for these currencies has been relatively stable, and, consequently, the Company typically does not use financial instruments to hedge this risk, but evaluates it on a continual basis and may put financial instruments in place in the future if deemed necessary. Foreign currency translations are reported as accumulated other comprehensive income in the Company's condensed consolidated financial statements.

Credit Risk

Credit risk, with respect to accounts receivable, is due to the limited number of customers concentrated in the oil and gas industry. The Company mitigates the risk of financial loss from defaults through defined collection terms in each contract or service agreement and periodic evaluations of the collectability of accounts receivable. The evaluations include a review of customer credit reports and past transaction history with the customer. The Company provides an allowance for doubtful accounts which is adjusted when the Company becomes aware of a specific customer's inability to meet its financial obligations or as a result of changes in the overall aging of accounts receivable.

Liquidity Risk

The Company maintains cash and cash equivalent balances with major financial institutions which, at times, exceed federally insured limits. The Company monitors the financial condition of the financial institutions and has not experienced losses associated with these accounts during 2014 or 2013. Liquidity risk is managed by continuously monitoring forecasted and actual cash flows and by matching the maturity profiles of financial assets and liabilities (see Note 6 – Long-Term Debt).

Note 4 – Goodwill and Intangibles

Goodwill

Goodwill relates to the acquisitions of LandTel Communications LLC (LandTel), OilCamp AS (OilCamp), and Nessco Group Holdings Ltd. (Nessco) as the consideration paid exceeded the fair value of acquired identifiable net tangible and intangible assets. Goodwill is reviewed for impairment annually with additional evaluations being performed when events or circumstances indicate that the carrying value of these assets may not be recoverable. The Company performs its annual impairment test on July 31st, with the most recent test being performed as of July 31, 2013. The 2013 test resulted in no impairment as the fair value of each reporting unit exceeded the carrying value plus goodwill of that reporting unit. No impairment indicators have been identified through June 30, 2014. As of June 30, 2014 and December 31, 2013, goodwill was \$35.2 million and \$34.5 million, respectively. Goodwill increases or decreases in value due to the effect of foreign currency translation.

Intangibles

Intangibles consist of customer relationships (acquired as part of the LandTel, OilCamp, Nessco and Inmarsat's Enterprise Energy business unit acquisitions), as well as trade name and covenant not-to-compete (acquired as part of the Nessco acquisition), backlog (acquired as part of the Nessco and Inmarsat's Enterprise Energy business unit acquisitions), licenses (acquired as part of the Inmarsat's Enterprise Energy business unit acquisition) and internal-use software. The Company's intangibles have useful lives ranging from 1.7 to 9.0 years and are amortized on a straight-line basis. Impairment testing is performed when events or circumstances indicate that the carrying value of the assets may not be recoverable. No impairment indicators have been identified as of June 30, 2014. As of June 30, 2014 and December 31, 2013, intangibles were \$20.7 million and \$17.6 million, respectively. During the three months ended June 30, 2014 and 2013, the Company recognized amortization expense of \$1.2 million and \$1.0 million, respectively. During the six months ended June 30, 2014 and 2013, the Company recognized amortization expense of \$2.5 million and \$2.1 million, respectively.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

The following table sets forth expected amortization expense of intangibles for the remainder of 2014 and the following years (in thousands):

2014	\$ 2,408
2015	4,962
2016	3,990
2017	3,915
2018	3,211
Thereafter	2,209
	<u>\$20,695</u>

Note 5 – Restricted Cash

As of June 30, 2014, the Company had restricted cash of \$0.5 million and \$1.0 million, in current and long-term assets, respectively. As of December 31, 2013, the Company had restricted cash of \$0.5 million and \$1.3 million, in current and long-term assets, respectively. This restricted cash is being used to collateralize outstanding performance bonds for Nessco's telecoms systems integration projects which were in effect prior to RigNet acquiring Nessco (see Note 6 – Long-Term Debt).

Note 6 – Long-Term Debt

As of June 30, 2014 and December 31, 2013, the following credit facilities and long-term debt arrangements with financial institutions were in place:

	<u>June 30,</u> <u>2014</u>	<u>December 31,</u> <u>2013</u>
	(in thousands)	
Term loan, net of unamortized deferred financing costs	\$55,324	\$ 59,537
Revolving loan	30,000	—
Equipment notes	—	26
	<u>85,324</u>	<u>59,563</u>
Less: Current maturities of long-term debt	<u>(8,395)</u>	<u>(8,388)</u>
	<u>\$76,929</u>	<u>\$ 51,175</u>

Term Loan

The Company has a term loan (Term Loan) with four participating financial institutions. On October 3, 2013, the Company amended its Term Loan, which increased the principal balance to \$60.0 million from \$54.6 million and extended the maturity of the loan from July 2017 to October 2018.

Additionally, the amended Term Loan bears an interest rate of LIBOR plus a margin ranging from 1.5% to 2.5% based on a ratio of funded debt to Adjusted EBITDA, a non-GAAP financial measure as defined in the agreement. Interest is payable monthly along with quarterly principal installments of \$2.1 million, with the balance due October 2018. The weighted average interest rate for the three months ended June 30, 2014 and 2013 were 2.1% and 2.8%. The weighted average interest rate for the six months ended June 30, 2014 and 2013 were 2.0% and 2.9%, respectively, with an interest rate of 2.2% at June 30, 2014.

The Term Loan is secured by substantially all the assets of the Company. As of June 30, 2014, the Term Loan had outstanding principal of \$55.7 million.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Revolving Loans

Under the amended and restated credit agreement dated October 3, 2013, the Company also secured a \$125.0 million revolving credit facility, which includes a \$15 million sublimit for the issuance of standby letters of credit. During the six months ended June 30, 2014, RigNet drew \$30.0 million of this credit facility related to the acquisition of Inmarsat's Enterprise Energy business unit (see Note 2 – Business Combinations). As of June 30, 2014, \$30.0 million in draws have been made on the facility. The weighted average interest rate for the three and six months ended June 30, 2014 was 2.1% and 2.0%, respectively, with an interest rate of 2.2% at June 30, 2014.

Performance Bonds

On September 14, 2012, NesscoInvsat Limited, a subsidiary of RigNet, secured a performance bond facility with a lender in the amount of £4.0 million, or \$6.8 million. This facility has a maturity date of June 30, 2017. As of June 30, 2014, the amount available under this facility was £2.1 million or \$3.5 million.

Certain legacy Nessco performance bonds also require the Company to maintain restricted cash balances on a dollar of restricted cash for a dollar of performance bond basis to collateralize outstanding performance bonds. As of June 30, 2014, the Company had restricted cash of \$0.5 million and \$1.0 million, in current and long-term assets, respectively, to satisfy this requirement. As of December 31, 2013, the Company had restricted cash of \$0.5 million and \$1.3 million, in current and long-term assets, respectively, to satisfy this requirement.

Covenants and Restrictions

The Company's Term Loan contains certain covenants and restrictions, including restricting the payment of cash dividends under default and maintaining certain financial covenants such as a ratio of funded debt to Adjusted EBITDA, a non-GAAP financial measure as defined in the agreement, and a fixed charge coverage ratio. If any default occurs related to these covenants, the unpaid principal and any accrued interest shall be declared immediately due and payable. As of June 30, 2014 and December 31, 2013, the Company believes it was in compliance with all covenants.

Debt Maturities

The following table sets forth the aggregate principal maturities of long-term debt, net of deferred financing cost amortization, for the remainder of 2014 and the following years (in thousands):

2014	\$ 4,384
2015	8,403
2016	8,420
2017	8,439
2018	55,678
Total debt, including current maturities	<u>\$85,324</u>

Note 7 – Fair Value Disclosures

The Company uses the following methods and assumptions to estimate the fair value of financial instruments:

- **Cash and Cash Equivalents** — Reported amounts approximate fair value based on quoted market prices (Level 1).
- **Restricted Cash** — Reported amounts approximate fair value.
- **Accounts Receivable** — Reported amounts, net of the allowance for doubtful accounts, approximate fair value due to the short term nature of these assets.
- **Accounts Payable, Including Income Taxes Payable and Accrued Expenses** — Reported amounts approximate fair value due to the short term nature of these liabilities.
- **Long-Term Debt** — The carrying amount of the Company's floating-rate debt approximates fair value since the interest rates paid are based on short-term maturities and recent quoted rates from financial institutions. The estimated fair value of debt was calculated based upon observable (Level 2) inputs regarding interest rates available to the Company at the end of each respective period.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**Note 8 – Income Taxes**

The Company's effective income tax rate was 37.4% and 34.2% for the three months ended June 30, 2014 and 2013, respectively. The Company's effective income tax rate was 45.2% and 36.8% for the six months ended June 30, 2014 and 2013, respectively. The Company's effective tax rates are affected by factors including fluctuations in income across jurisdictions with varying tax rates, changes in valuation allowances related to operating in a loss jurisdiction for which a benefit cannot be claimed, and changes in income tax reserves, including related penalties and interest.

The Company has computed the provision for taxes for the current and comparative periods using the actual year-to-date effective tax rate. The Company's financial projections for those periods did not provide the level of detail necessary to calculate a forecasted effective tax rate.

Note 9 – Stock-Based Compensation

During the six months ended June 30, 2014, the Company granted 66,682 shares of restricted stock to certain directors, officers and employees of the Company under the 2010 Omnibus Incentive Plan (2010 Plan). Restricted shares issued to officers and employees, totaling 43,212 shares, vest over a four year period of continued employment, with 25% of the options vesting on each of the first four anniversaries of the grant date. Restricted shares issued to directors, totaling 23,470 shares, vested in May 2014.

The fair value of restricted stock is determined based on the closing trading price of the Company's common stock on the grant date of the award. Compensation expense is recognized on a straight-line basis over the requisite service period of the entire award.

During the six months ended June 30, 2014, the Company also granted 115,500 stock options to certain officers and employees of the Company under the 2010 Plan. Options granted during this period have an exercise price of \$47.17 to \$47.47, a contractual term of ten years and vest over a four year period of continued employment, with 25% of the options vesting on each of the first four anniversaries of the grant date.

The fair value of each stock option award is estimated on the grant date using a Black-Scholes option valuation model, which uses certain assumptions as of the date of grant.

The assumptions used for the stock option grants made during the six months ended June 30, 2014 and 2013, were as follows:

	Six Months Ended June 30,	
	2014	2013
Expected volatility	43%	50%
Expected term (in years)	7	7
Risk-free interest rate	2.2%	1.3%
Dividend yield	—	—

Based on these assumptions, the weighted average grant date fair value of stock options granted during the six months ended June 30, 2014 and 2013 was \$25.72 and \$11.11 per option, respectively.

Stock-based compensation expense related to the Company's stock-based compensation plans for the six months ended June 30, 2014 and 2013 was \$2.3 million and \$1.5 million, respectively. As of June 30, 2014, there was \$8.8 million of total unrecognized compensation cost related to unvested options and restricted stock expected to vest. This cost is expected to be recognized over a remaining weighted-average period of 2.5 years.

Note 10 – Related Party Transactions

One of the Company's former directors, who served on the board until May 2014, is the president and chief executive officer of a drilling corporation which is also a customer of the Company. Revenue recognized from that corporation for the three months ended June 30, 2014 and 2013 was \$0.3 million and \$0.4 million, respectively. Revenue recognized from that corporation for the six months ended June 30, 2014 and 2013 was \$0.7 million and \$0.9 million, respectively. All revenue relates to services performed by the Company in the ordinary course of business.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

One of the Company's consulting vendors is wholly owned by one of RigNet's significant shareholders. Expense recognized for the three and six months ended June 30, 2014 was \$0.5 million. All expenses were incurred by RigNet in the ordinary course of business.

Note 11 – Income per Share

Basic earnings per share (EPS) are computed by dividing net income attributable to RigNet common stockholders by the number of basic shares outstanding. Basic shares equal the total of the common shares outstanding, weighted for the average days outstanding for the period. Basic shares exclude the dilutive effect of common shares that could potentially be issued due to the exercise of stock options or the exercise of warrants. Diluted EPS is computed by dividing net income attributable to RigNet common stockholders by the number of diluted shares outstanding. Diluted shares equal the total of the basic shares outstanding and all potentially issuable shares, weighted for the average days outstanding for the period. The Company uses the treasury stock method to determine the dilutive effect.

For the three months ended June 30, 2014 and 2013, 618,341 and 1,516,867 shares of unexercised or unvested securities, respectively, were included in the diluted earnings per share computation due to the dilutive effect. For the six months ended June 30, 2014 and 2013, 650,460 and 1,500,596 shares of unexercised or unvested securities, respectively, were included in the diluted earnings per share computation due to the dilutive effect.

Note 12 – Commitments and Contingencies

Litigation

The Company, in the ordinary course of business, is a claimant or a defendant in various legal proceedings, including proceedings as to which the Company has insurance coverage and those that may involve the filing of liens against the Company or its assets. The Company does not consider its exposure in these proceedings, individually or in the aggregate, to be material.

Regulatory Matter

In 2013, RigNet's internal compliance program detected potential violations of U.S. sanctions regulations by one of its foreign subsidiaries in connection with certain of its customers' rigs that were moved into the territorial waters of countries sanctioned by the United States. The Company estimates that it received total revenue of approximately \$0.1 million during the period related to the potential violations. The Company has voluntarily self-reported the potential violations to U.S. Treasury Department's Office of Foreign Assets Control (OFAC) and the U.S. Department of Commerce Bureau of Industry and Security (BIS) and retained outside counsel who conducted an investigation of the matter under the supervision of the Company's Audit Committee and submitted a report to OFAC and BIS. The Company continues cooperating with OFAC and BIS with respect to resolution of the matter.

The Company incurred legal expenses of \$0.0 million and \$0.9 million in connection with the investigation as of June 30, 2014 and 2013, respectively. The Company may continue to incur significant legal fees and related expenses and the investigations may involve management time in the future in order to cooperate with OFAC and BIS. The Company cannot predict the ultimate outcome of the investigation, the total costs to be incurred in completing the investigation, the potential impact on personnel, the effect of implementing any further measures that may be necessary to ensure full compliance with applicable laws or to what extent, if at all, the Company could be subject to fines, sanctions or other penalties.

Based on the information available at this time and management's understanding of the potential sanctions, the Company currently estimates that it may incur penalties associated with these potential violations within a range of \$0.2 million to \$1.5 million. The Company has accrued an estimated liability of \$0.8 million as management believes this is the most probable outcome. This estimate is based on RigNet's internal investigation and no assurance can be given as to what, if any, penalties OFAC or BIS will impose or whether it will identify or allege additional violations or remedies.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS***Operating Leases***

The Company leases office space under lease agreements expiring on various dates through 2020. For the three months ended June 30, 2014 and 2013, the Company recognized expense under operating leases of \$0.7 million and \$0.6 million, respectively. For the six months ended June 30, 2014 and 2013, the Company recognized expense under operating leases of \$1.3 million and \$1.3 million, respectively.

As of June 30, 2014, future minimum lease obligations for the remainder of 2014 and future years were as follows (in thousands):

2014	\$1,410
2015	2,111
2016	1,257
2017	728
2018	602
Thereafter	726
	<u>\$6,834</u>

Commercial Commitments

The Company enters into contracts for satellite bandwidth and other network services with certain providers.

As of June 30, 2014, the Company had the following commercial commitments related to satellite and network services for the remainder of 2014 and future years were as follows (in thousands):

2014	\$15,790
2015	17,530
2016	12,293
2017	17,347
2018	16,084
	<u>\$79,044</u>

On January 31, 2014, RigNet finalized an agreement with Inmarsat to become a distributor of Inmarsat's Global Xpress (GX) and L-band satellite communications network services. RigNet has agreed, under certain conditions, to purchase up to \$65.0 million of capacity from the high-throughput GX network during the five years after it becomes operational. The Company expects to utilize GX and L-band services across RigNet's legacy operations as well as the operations acquired from Inmarsat. The portion of this agreement expected to be committed through 2018 is reflected in the table above.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Note 13 – Segment Information

Segment information is prepared consistent with the components of the enterprise for which separate financial information is available and regularly evaluated by the chief operating decision-maker for the purpose of allocating resources and assessing performance.

In connection with the acquisition of Inmarsat's Enterprise Energy business unit, the Company evaluated its current core assets and operations, and organized them into segments. The Company is now presenting Telecoms Systems Integration as a separate reportable segment, as this is now a greater portion of the Company's core assets and operations due to the acquisition of Inmarsat's Enterprise Energy business unit. Certain operating segments are aggregated into one reportable segment based on similar economic characteristics. Accordingly, RigNet now considers its business to consist of three reportable segments:

- **Eastern Hemisphere.** The Eastern Hemisphere segment provides remote communications services for offshore drilling rigs and production facilities, as well as, energy support vessels and other remote sites. The Eastern Hemisphere segment services are primarily performed out of the Company's Norway, United Kingdom, Qatar, and Singapore based offices for customers and rig sites located on the eastern side of the Atlantic Ocean primarily off the coasts of the United Kingdom, Norway, West Africa, around the Indian Ocean in Qatar, Saudi Arabia and India, around the Pacific Ocean near Australia, and within the South China Sea.
- **Western Hemisphere.** The Western Hemisphere segment provides remote communications services for offshore and onshore drilling rigs and production facilities, as well as, energy support vessels and other remote sites. The Western Hemisphere segment services are primarily performed out of the Company's United States and Brazil based offices for onshore and offshore customers and rig sites located on the western side of the Atlantic Ocean primarily in the United States, Canada, Mexico and Brazil, and within the Gulf of Mexico.
- **Telecoms Systems Integration (TSI).** The TSI segment designs, assembles, installs and commissions turn-key solutions for customer telecommunications systems. TSI segment solutions are custom designed and engineered turn-key solutions based on the customer's specifications, as well as, international industry standards and best practices. TSI projects include consultancy services, design, engineering, project management, procurement, testing, installation, commissioning and after-sales service. The TSI segment services are primarily performed out of the Company's United Kingdom and United States based offices for customers globally.

Corporate and eliminations primarily represents unallocated corporate office activities, interest expenses, income taxes and eliminations.

The Company's business segment information as of and for the three and six months ended June 30, 2014 and 2013, is presented below. Prior year information has been recast to conform to the current year presentation.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

The following table presents revenue earned from the Company's domestic and international operations for the three and six months ended June 30, 2014 and 2013. Revenue is based on the location where services are provided or goods are sold. Due to the mobile nature of RigNet's customer base and the services provided, the Company works closely with its customers to ensure rig or vessel moves are closely monitored to ensure location of service information is properly reflected.

Item 2. Management's Discussion And Analysis Of Financial Condition And Results Of Operations

Management's Discussion and Analysis of Financial Condition and Results of Operations should be read in conjunction with the accompanying unaudited condensed consolidated financial statements as of June 30, 2014 and for the three and six months ended June 30, 2014 and 2013 included elsewhere herein, and with our annual report on Form 10-K for the year ended December 31, 2013. The following discussion and analysis contains forward-looking statements that involve risks and uncertainties. Our actual results may differ materially from those anticipated in these forward-looking statements as a result of certain factors, including those set forth under "Risk Factors" in Item 1A of our annual report and elsewhere in this quarterly report. See "Forward-Looking Statements" below.

Forward-Looking Statements

This Quarterly Report on Form 10-Q contains forward-looking statements, within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, that are subject to a number of risks and uncertainties, many of which are beyond the Company's control. These statements may include statements about:

- new regulations, delays in drilling permits or other changes in the drilling industry;
- competition and competitive factors in the markets in which we operate;
- demand for our products and services;
- the advantages of our services compared to others;
- changes in customer preferences and our ability to adapt our product and services offerings;
- our ability to develop and maintain positive relationships with our customers;
- our ability to retain and hire necessary employees and appropriately staff our marketing, sales and distribution efforts;
- our cash needs and expectations regarding cash flow from operations;
- our ability to manage and grow our business and execute our business strategy, including expanding our penetration of the U.S. and international onshore and offshore drilling rigs;
- our strategy;
- our financial performance, including our ability to expand Adjusted EBITDA through our operational leverage; and
- the costs associated with being a public company.

In some cases, forward-looking statements can be identified by terminology such as "may," "could," "should," "would," "expect," "plan," "project," "intend," "anticipate," "believe," "estimate," "predict," "potential," "pursue," "target," "continue," the negative of such terms or other comparable terminology that convey uncertainty of future events or outcomes. All of these types of statements, other than statements of historical fact included in this Quarterly Report on Form 10-Q, are forward-looking statements.

The forward-looking statements contained in this Quarterly Report on Form 10-Q are largely based on Company expectations, which reflect estimates and assumptions made by Company management. These estimates and assumptions reflect management's best judgment based on currently known market conditions and other factors. Although the Company believes such estimates and assumptions to be reasonable, they are inherently uncertain and involve a number of risks and uncertainties beyond its control. In addition, management's assumptions may prove to be inaccurate. The Company cautions that the forward-looking statements contained in this Quarterly Report on Form 10-Q are not guarantees of future performance, and it cannot assure any reader that such statements will be realized or the forward-looking statements or events will occur. Future results may differ materially from those anticipated or implied in forward-looking statements due to factors listed in the "Risk Factors" section of our annual report on Form 10-K for the year ended December 31, 2013 and elsewhere in this Quarterly Report on Form 10-Q. If one or more of these factors materialize, or if any underlying assumptions prove incorrect, our future results, performance or achievements may vary materially from any future results, performance or achievements expressed or implied by these forward-looking statements. The forward-looking statements speak only as of the date made, and other than as required by law, the Company undertakes no obligation to publicly update or revise any forward-looking statement, whether as a result of new information, future events or otherwise.

Our Operations

We are a global provider of managed remote communications, telecoms systems integration (project management of turn-key engineered telecommunications solutions) and collaborative applications dedicated to the oil and gas industry, focusing on offshore and onshore drilling rigs, energy production facilities and energy maritime. We focus on developing customer relationships in the oil and gas industry resulting in a significant portion of our revenue being concentrated in a few customers. In addition, due to the concentration of our customers in the oil and gas industry, we face the challenge of service demands fluctuating with the exploration and development plans and capital expenditures of that industry.

Network service customers are primarily served under fixed-price, day-rate contracts, which are based on the concept of pay-per-day of use and are consistent with other service terms used in the oil and gas industry. Our contracts are generally in the form of Master Service Agreements, or MSAs, with specific services being provided under individual service orders that have a term of one to three years with renewal options, while land-based locations are generally shorter term or terminable on short notice without a penalty. Service orders are executed under the MSA for individual remote sites or groups of sites, and generally may be terminated early on short notice without penalty in the event of force majeure, breach of the MSA or cold stacking of a drilling rig (when a rig is taken out of service and is expected to be idle for a protracted period of time).

Segment information is prepared consistent with the components of the enterprise for which separate financial information is available and regularly evaluated by the chief operating decision-maker for the purpose of allocating resources and assessing performance.

In connection with the acquisition of Inmarsat's Enterprise Energy business unit, we evaluated our current core assets and operations, and organized them into segments. We are now presenting Telecoms Systems Integration as a separate reportable segment, as this is now a greater portion of our core assets and operations due to the acquisition of Inmarsat's Enterprise Energy business unit. Certain operating segments are aggregated into one reportable segment based on similar economic characteristics. Accordingly, we operate three reportable segments, which are managed as distinct business units by our chief operating decision-maker.

- **Eastern Hemisphere.** Our Eastern Hemisphere segment provides remote communications services for offshore and onshore drilling rigs and production facilities, as well as, energy support vessels and other remote sites. Our Eastern Hemisphere segment services are primarily performed out of our Norway, United Kingdom, Qatar, and Singapore based offices for customers and rig sites located on the eastern side of the Atlantic Ocean primarily off the coasts of the United Kingdom, Norway, West Africa, around the Indian Ocean in Qatar, Saudi Arabia and India, around the Pacific Ocean near Australia, and within the South China Sea.
- **Western Hemisphere.** Our Western Hemisphere segment provides remote communications services for offshore and onshore drilling rigs and production facilities, as well as, energy support vessels and other remote sites. Our Western Hemisphere segment services are primarily performed out of the our United States and Brazil based offices for onshore and offshore customers and rig sites located on the western side of the Atlantic Ocean primarily in the United States, Canada, Mexico and Brazil, and within the Gulf of Mexico.
- **Telecoms Systems Integration (TSI).** Our TSI segment designs, assembles, installs and commissions turn-key solutions for customer telecommunications systems. TSI segment solutions are custom designed and engineered turn-key solutions based on the customer's specifications, as well as, international industry standards and best practices. TSI projects include consultancy services, design, engineering, project management, procurement, testing, installation, commissioning and after-sales service. Our TSI segment services are primarily performed out of our United Kingdom and United States based offices for customers globally.

Cost of revenue consists primarily of satellite charges, voice and data termination costs, network operations expenses, internet connectivity fees, equipment purchases for telecoms systems integration projects and direct service labor. Direct service labor consists of field technicians, our Network Operations Center (NOC) employees, and other employees who directly provide services to customers. Satellite charges consist of the costs associated with obtaining satellite bandwidth (the measure of capacity) used in the transmission of service to and from leased satellites. Network operations expenses consist primarily of costs associated with the operation of our network operations center, which is maintained 24 hours a day, seven days a week. Depreciation and amortization is recognized on all property, plant and equipment either installed at a customer's site or held at our corporate and regional offices, as well as intangibles arising from acquisitions and internal use software. Selling and marketing expenses consist primarily of salaries and commissions, travel costs and marketing communications. General and administrative expenses consist of expenses associated with our management, finance, contract, support and administrative functions.

[Table of Contents](#)

Profitability increases at a site as we add customers and value-added services. Assumptions used in developing the day rates for a site may not cover cost variances from inherent uncertainties or unforeseen obstacles, including both physical conditions and unexpected problems encountered with third party service providers.

Recent Developments

On January 31, 2014, we closed our acquisition of Inmarsat Plc's Energy Broadband Operations (Inmarsat) for an aggregate purchase price of \$26.1 million, including \$12.3 million of working capital. Under the terms of the deal, Inmarsat sold to us substantially all of its energy broadband assets, which include: microwave and WiMAX networks in the U.S. Gulf of Mexico and the North Sea serving drillers, producers and energy vessel owners; VSAT interests in the United Kingdom, U.S. and Canada; an M2M SCADA VSAT network in the continental U.S. serving the pipeline industry; a telecommunications systems integration business operating worldwide; and a global L-band MSS retail energy business.

We financed the transaction with borrowings under our new credit facility announced on October 3, 2013 and existing cash on hand.

For the three and six months ended June 30, 2014, we spent \$0.6 million and \$2.9 million, respectively, on acquisition-related costs in connection with this acquisition, which are reported as general and administrative expense in our condensed consolidated financial statements.

Additionally, on January 31, 2014, we finalized an agreement with Inmarsat to become a distributor of Inmarsat's Global Xpress (GX) and L-band satellite communications network services, which will enable us to offer next-generation satellite services to existing and new customers in the global energy sector worldwide. We have agreed, under certain conditions, to purchase up to \$65.0 million of capacity from the high-throughput GX network during the five years after it becomes operational. We expect to utilize GX and L-band services across our own business as well as that of the acquired Energy Broadband business.

Known Trends and Uncertainties

Uncertainties that could impact profitability include oil and gas market trends (exploration and development plans and capital expenditures of that industry), service responsiveness to remote locations, communication network complexities, political and economic instability in certain regions, export restrictions, licenses and other trade barriers. These uncertainties may result in the delay of service initiation, which may negatively impact our results of operations.

Uncertainties that could impact operating cash flows include the availability and cost of satellite bandwidth, timing of collecting our receivables, and our ability to increase our contracted services through sales and marketing efforts while leveraging the contracted satellite and other communication service costs.

We cannot predict the ultimate outcome of the OFAC and BIS investigation (described in this Item under the heading "Regulatory Matter"), the total costs to be incurred in completing the investigation, the potential impact on personnel, the effect of implementing any further measures that may be necessary to ensure full compliance with applicable laws or to what extent, if at all, we could be subject to fines, sanctions or other penalties.

During our annual July 31, 2013 impairment test, the fair value of goodwill held by our U.S. Land reporting unit, in our Western Hemisphere reportable segment, exceeded carrying value by 11.1%. As of June 30, 2014, the goodwill balance held by our North America Land (previously known as U.S. Land) reporting unit was \$10.9 million. Any future downturn in our North America Land business could adversely impact the key assumptions in our goodwill impairment test. While we believe that there appears to be no indication of current or future impairment, historical operating results may not be indicative of future operating results and events and circumstances may occur causing a triggering event in a period as short as three months.

[Table of Contents](#)**Results of Operations**

The following table sets forth selected financial and operating data for the periods indicated.

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2014	2013	2014	2013
Revenue	\$80,656	\$51,329	\$155,699	\$104,147

Three Months Ended June 30, 2014 and 2013

Revenue. Revenue increased by \$29.3 million, or 57.1%, to \$80.7 million for the three months ended June 30, 2014 from \$51.3 million for the three months ended June 30, 2013. The acquisition of Inmarsat's Enterprise Energy business unit contributed \$19.2 million for the three months ended June 30, 2014, across all three reportable segments. Excluding Inmarsat's Enterprise Energy business unit, revenue increased by \$10.1 million, or 19.7%. This organic increase was driven by the Eastern Hemisphere segment which increased \$5.8 million, or 18.6%, and the Western Hemisphere segment which increased \$4.1 million, or 31.3%. These increases are primarily due to increased revenue-per-site and increased sites served across the Eastern and Western Hemisphere segments.

Cost of Revenue. Costs increased by \$19.7 million, or 76.1%, to \$45.7 million for the three months ended June 30, 2014 from \$25.9 million for the three months ended June 30, 2013. The acquisition of Inmarsat's Enterprise Energy business unit added \$13.5 million to costs for the three months ended June 30, 2014. Excluding Inmarsat's Enterprise Energy business unit, costs increased by \$6.2 million, or 24.0%, to \$32.2 million for the three months ended June 30, 2014 from \$25.9 million for the three months ended June 30, 2013. This increase is primarily due to incremental network services and satellite charges to support growing bandwidth needs of our customers across the Eastern and Western Hemisphere segments and due to increased costs for our TSI projects.

[Table of Contents](#)

Gross Profit (excluding depreciation and amortization) increased by \$9.6 million, or 37.8%, to \$35.0 million for the three months ended June 30, 2014 from \$25.4 million for the three months ended June 30, 2013. Gross Profit (excluding depreciation and amortization) as a percentage of revenue decreased to 43.4%, for the three months ended June 30, 2014 compared to 49.5% for the three months ended June 30, 2013. Excluding Inmarsat's Enterprise Energy business unit, Gross Profit (excluding depreciation and amortization) increased by \$3.9 million, or 15.4%, to \$29.3 million for the three months ended June 30, 2014 from \$25.4 million for the three months ended June 30, 2013. Excluding Inmarsat's Enterprise Energy business unit, Gross Profit (excluding depreciation and amortization) as a percentage of revenue decreased to 47.7%, for the three months ended June 30, 2014 compared to 49.5% for the three months ended June 30, 2013. The increased Gross Profit (excluding depreciation and amortization) on lower margins is primarily attributable to growing bandwidth needs of our customers across the Eastern and Western Hemisphere segments and due to increased costs for our TSI projects, which have supported our growing revenues and Gross Profit (excluding depreciation and amortization) albeit at lower margin percentages.

Depreciation and Amortization. Depreciation and amortization expense increased by \$2.0 million to \$7.3 million for the three months ended June 30, 2014 from \$5.2 million for the three months ended June 30, 2013. This increase is primarily attributable to the continued increase in our capital expenditures and the acquisition of depreciable property, plant and equipment and amortizable intangibles as part of the Inmarsat's Enterprise Energy business unit acquisition.

Selling and Marketing. Selling and marketing expense increased by \$0.7 million to \$1.8 million for the three months ended June 30, 2014 from \$1.0 million for the three months ended June 30, 2013.

General and Administrative. General and administrative expenses increased by \$4.6 million to \$16.2 million for the three months ended June 30, 2014 from \$11.5 million for the three months ended June 30, 2013. General and administrative costs increased primarily due to costs and increased office space related to the acquisition of Inmarsat's Enterprise Energy business unit, increased compensation resulting from headcount additions and increased stock-based compensation.

Income Tax Expense. Our effective income tax rate was 37.4% and 34.2% for the three months ended June 30, 2014 and 2013, respectively. Our effective tax rates are affected by factors including fluctuations in income across jurisdictions with varying tax rates, changes in valuation allowances related to operating in a loss jurisdiction for which a benefit cannot be claimed, and changes in income tax reserves, including related penalties and interest.

Six Months Ended June 30, 2014 and 2013

Revenue. Revenue increased by \$51.6 million, or 49.5%, to \$155.7 million for the six months ended June 30, 2014 from \$104.1 million for the six months ended June 30, 2013. The acquisition of Inmarsat's Enterprise Energy business unit contributed \$32.9 million for the six months ended June 30, 2014 across all reportable segments. Excluding Inmarsat's Enterprise Energy business unit, revenue increased by \$18.6 million, or 17.9%. This organic increase was driven by the Eastern Hemisphere segment which increased \$12.6 million or 21.1% and the Western Hemisphere segment which increased \$6.3 million, or 24.7%. These increases are primarily due to increased revenue-per-site and increased sites served across the Eastern and Western Hemisphere segments.

Cost of Revenue. Costs increased by \$37.1 million, or 67.4%, to \$92.2 million for the six months ended June 30, 2014 from \$55.0 million for the six months ended June 30, 2013. The acquisition of Inmarsat's Enterprise Energy business unit added \$24.9 million to costs for the six months ended June 30, 2014. Excluding Inmarsat's Enterprise Energy business unit, costs increased by \$12.3 million, or 22.3%, to \$67.3 million for the six months ended June 30, 2014 from \$55.0 million for the six months ended June 30, 2013. This increase is primarily due to incremental network services and satellite charges to support growing bandwidth needs of our customers across the Eastern and Western Hemisphere segments and due to increased costs for our TSI projects.

[Table of Contents](#)

Gross Profit (excluding depreciation and amortization) increased by \$14.4 million, or 29.4%, to \$63.5 million for the six months ended June 30, 2014 from \$49.1 million for the six months ended June 30, 2013. Gross Profit (excluding depreciation and amortization) as a percentage of revenue decreased to 40.8% for the six months ended June 30, 2014 compared to 47.1% for the six months ended June 30, 2013. Excluding Inmarsat's Enterprise Energy business unit, Gross Profit (excluding depreciation and amortization) increased by \$6.4 million, or 13.0%, to \$55.5 million for the six months ended June 30, 2014 from \$49.1 million for the six months ended June 30, 2013. Excluding Inmarsat's Enterprise Energy business unit, Gross Profit (excluding depreciation and amortization) as a percentage of revenue decreased to 45.2% for the six months ended June 30, 2014 compared to 47.1% for the six months ended June 30, 2013. The increased Gross Profit (excluding depreciation and amortization) on lower margins is primarily attributable to growing bandwidth needs of our customers across the Eastern and Western Hemisphere segments and due to increased costs for our TSI projects, which have supported our growing revenues and Gross Profit (excluding depreciation and amortization) albeit at lower margins.

Depreciation and Amortization. Depreciation and amortization expense increased by \$3.9 million to \$14.1 million for the six months ended June 30, 2014 from \$10.2 million for the six months ended June 30, 2013. This increase is primarily attributable to the continued increase in our capital expenditures and the acquisition of depreciable property, plant and equipment and amortizable intangibles as part of the Inmarsat's Enterprise Energy business unit acquisition.

Selling and Marketing. Selling and marketing expense increased by \$1.5 million to \$3.3 million for the six months ended June 30, 2014 from \$1.8 million for the six months ended June 30, 2013.

General and Administrative. General and administrative expenses increased by \$7.7 million to \$31.0 million for the six months ended June 30, 2014 from \$23.3 million for the six months ended June 30, 2013. General and administrative costs increased primarily due to costs and increased office space related to the acquisition of Inmarsat's Enterprise Energy business unit, increased compensation resulting from headcount additions and increased stock-based compensation.

Income Tax Expense. Our effective income tax rate was 45.2% and 36.8% for the six months ended June 30, 2014 and 2013, respectively. Our effective tax rates are affected by factors including fluctuations in income across jurisdictions with varying tax rates, changes in valuation allowances related to operating in a loss jurisdiction for which a benefit cannot be claimed, and changes in income tax reserves, including related penalties and interest. The increase in the effective tax rate was primarily attributable to our recognizing a larger valuation allowance during the six months ended June 30, 2014 as a result of increased domestic losses caused by costs related to the acquisition of Inmarsat's Enterprise Energy business unit.

Liquidity and Capital Resources

At June 30, 2014, we had working capital of \$97.3 million, including cash and cash equivalents of \$61.0 million, current restricted cash of \$0.5 million, accounts receivable of \$83.0 million and other current assets of \$12.8 million, offset by \$16.4 million in accounts payable, \$25.3 million in accrued expenses, \$8.4 million in current maturities of long-term debt, \$2.9 million in tax related liabilities and \$7.0 million in deferred revenue.

Over the past three years, annual capital expenditures have grown from \$19.2 million to \$30.2 million due to continued increase of sites served. Based on our current expectations, we believe our liquidity and capital resources will be sufficient for the conduct of our business and operations for the foreseeable future. We may also use a portion of our available cash to finance growth through the acquisition of, or investment in, businesses, products, services or technologies complementary to our current business.

During the next twelve months, we expect our principal sources of liquidity to be cash flows from operating activities, cash and cash equivalents and availability under our credit facility. In forecasting our cash flows we have considered factors including contracted services related to long-term deepwater drilling programs, U.S. land rig count trends, projected oil and natural gas prices, contracted and available satellite bandwidth and the additional operations acquired from Inmarsat's Enterprise Energy business unit.

While we believe we have sufficient liquidity and capital resources to meet our current operating requirements and expansion plans, we may elect to pursue additional expansion opportunities within the next year which could require additional financing, either debt or equity.

Beyond the next twelve months, we expect our principal sources of liquidity to be cash flows provided by operating activities, cash and cash equivalents on hand, availability under our credit facility and additional financing activities we may pursue, which may include debt or equity offerings.

	Six Months Ended June 30,	
	2014	2013
(in thousands)		
Condensed Consolidated Statements of Cash Flows Data:		
Cash and cash equivalents, January 1,	\$ 59,822	\$ 59,744
Net cash provided by operating activities	10,040	9,473
Net cash used in investing activities	(37,875)	(14,539)
Net cash provided by (used in) financing activities	27,572	(3,747)
Changes in foreign currency translation	1,448	(2,330)
Cash and cash equivalents, June 30,	<u>\$ 61,007</u>	<u>\$ 48,601</u>

Currently, the Norwegian kroner and the British pound sterling are the currencies that could materially impact our liquidity. Our historical experience with exchange rates for these currencies has been relatively stable and, consequently, we do not typically hedge these risks, but evaluate these risks on a continual basis and may put financial instruments in place in the future if deemed necessary. During the six months ended June 30, 2014 and 2013, 75.5% and 59.8% of our revenue was denominated in U.S. dollars, respectively.

Operating Activities

Net cash provided by operating activities was \$10.0 million for the six months ended June 30, 2014 compared to \$9.5 million for the six months ended June 30, 2013. The increase in cash provided by operating activities during 2014 of \$0.6 million was primarily due to changes in our prepaid expenses due to TSI projects, increased accrued expenses, increased depreciation and increased deferred revenue and amortization offset by the timing of collections of our accounts receivable and paying our accounts payable.

Our cash provided by operations is subject to many variables, the most significant of which is the volatility of the oil and gas industry and, therefore, the demand for our services. Other factors impacting operating cash flows include the availability and cost of satellite bandwidth, as well as the timing of collecting our receivables. Our future cash flow from operations will depend on our ability to increase our contracted services through our sales and marketing efforts while leveraging the contracted satellite and other communication service costs.

Investing Activities

Net cash used in investing activities was \$37.9 million and \$14.5 million for the six months ended June 30, 2014 and 2013, respectively. Net cash used during the six months ended June 30, 2014 includes cash paid for the acquisition of Inmarsat's Enterprise Energy business unit, totaling \$23.3 million.

Additionally, net cash used during the six months ended June 30, 2014 and 2013 includes capital expenditures of \$15.8 million and \$15.2 million, respectively. We expect capital expenditures to continue to increase during 2014 primarily resulting from growth opportunities arising from increasing demand for our services.

Financing Activities

Net cash provided by financing activities was \$27.6 million compared to cash used in financing activities of \$3.7 million for the six months ended June 30, 2014 and 2013, respectively. Cash provided by financing activities for the six months ended June 30, 2014 consisted primarily of \$30.0 million in draws on our credit facility, which was and will be used, along with cash on hand, to finance our acquisition of Inmarsat's Enterprise Energy business unit. Cash used in financing activities during these periods include \$4.3 million and \$4.7 million of principal payments on our long-term debt, respectively.

Credit Agreement

The Company has a \$60.0 million term loan (Term Loan) and \$125.0 million revolving credit facility, which includes a \$15 million sublimit for the issuance of standby letters of credit.

[Table of Contents](#)

The Term Loan bears an interest rate of LIBOR plus a margin ranging from 1.5% to 2.5%, based on a ratio of funded debt to Adjusted EBITDA, a non-GAAP financial measure defined in the agreement. Interest is payable monthly along with quarterly principal installments of \$2.1 million, with the balance due October 2018. The weighted average interest rate for the three months ended June 30, 2014 and 2013 were 2.1% and 2.8%. The weighted average interest rate for the six months ended June 30, 2014 and 2013 were 2.0% and 2.9%, respectively, with an interest rate of 2.2% at June 30, 2014. The Term Loan is secured by substantially all the assets of the Company. As of June 30, 2014, the outstanding principal amount of the Term Loan was \$55.7 million.

Our Term Loan agreement imposes certain restrictions including our ability to obtain additional debt financing and on our payment of cash dividends. It also requires us to maintain certain financial covenants such as a funded debt to Adjusted EBITDA ratio of less than or equal to 3.0 to 1.0 and a fixed charge coverage ratio of not less than 1.25 to 1.0. At June 30, 2014, we believe we were in compliance with all covenants.

The revolving credit facility matures in October 2018 with any outstanding borrowings then payable. Borrowings under revolving facility carries an interest rate of LIBOR plus an applicable margin ranging from 1.5% to 2.5%, which varies as a function of the Company's leverage ratio. As of June 30, 2014, \$30.0 million in draws have been made on the facility. The weighted average interest rate for the three and six months ended June 30, 2014 was 2.1% and 2.0%, respectively, with an interest rate of 2.2% at June 30, 2014.

Off-Balance Sheet Arrangements

We do not engage in any off-balance sheet arrangements.

Regulatory Matter

In 2013, our internal compliance program detected potential violations of U.S. sanctions regulations by one of our foreign subsidiaries in connection with certain of our customers' rigs that were moved into the territorial waters of countries sanctioned by the United States. We estimate that we received total revenue of approximately \$0.1 million during the period related to the potential violations. These countries are subject to a number of economic regulations, including sanctions administered by OFAC, and comprehensive restrictions on the export and re-export of U.S.-origin items to these countries administered by BIS. Our customers that are not based in the U.S. are not subject to the same restrictions on operating in these countries as we are, but we are prohibited from providing services or facilitating the provision of services to their rigs in transit to or while operating in a sanctioned country.

Failure to comply with applicable laws and regulations relating to sanctions and export restrictions may subject us to criminal sanctions and civil remedies, including fines, denial of export privileges, injunctions or seizures of our assets. We have voluntarily self-reported the potential violations to OFAC and BIS and retained outside counsel who conducted an investigation of the matter and submitted a report to OFAC and BIS. We continue to cooperate with these agencies with respect to resolution of the matter.

We incurred legal expenses of \$0.0 million and \$0.9 million for the six months ended June 30, 2014 and 2013, respectively. We may continue to incur significant legal fees and related expenses, and the investigations may involve management time in the future in order to cooperate with OFAC and BIS. We cannot predict the ultimate outcome of the investigation, the total costs to be incurred in completing the investigation, the potential impact on personnel, the effect of implementing any further measures that may be necessary to ensure full compliance with applicable laws or to what extent, if at all, we could be subject to fines, sanctions or other penalties.

Non-GAAP Measures

The non-GAAP financial measures, Gross Profit (excluding depreciation and amortization) and Adjusted EBITDA, may not be comparable to similarly titled measures used by other companies. Therefore, these non-GAAP measures should be considered in conjunction with net income and other performance measures prepared in accordance with GAAP, such as gross profit, operating income or net cash provided by operating activities. Further, Gross Profit (excluding depreciation and amortization) and Adjusted EBITDA should not be considered in isolation or as a substitute for GAAP measures such as net income, gross profit, operating income or any other GAAP measure of liquidity or financial performance. Our Gross Profit (excluding depreciation and amortization) and Adjusted EBITDA may not be comparable to similarly titled measures of other companies because other companies may not calculate Gross Profit (excluding depreciation and amortization), Adjusted EBITDA or similarly titled measures in the same manner as we do. We prepare Gross Profit (excluding depreciation and amortization) and Adjusted EBITDA to eliminate the impact of items that we do not consider indicative of our core operating performance. We encourage you to evaluate these adjustments and the reasons we consider them appropriate.

[Table of Contents](#)

We believe Adjusted EBITDA is useful to investors in evaluating our operating performance for the following reasons:

- Securities analysts use Adjusted EBITDA as a supplemental measure to evaluate the overall operating performance of companies, and we understand our investor and analyst presentations include Adjusted EBITDA;
- By comparing our Adjusted EBITDA in different periods, our investors may evaluate our operating results without the additional variations caused by items that we do not consider indicative of our core operating performance and which are not necessarily comparable from year to year; and
- Adjusted EBITDA is an integral component of the financial ratio covenants of our debt agreement.

Our management uses Adjusted EBITDA:

- To indicate profit contribution;
- For planning purposes, including the preparation of our annual operating budget and as a key element of annual incentive programs;
- To allocate resources to enhance the financial performance of our business; and
- In communications with our Board of Directors concerning our financial performance.

Although Adjusted EBITDA is frequently used by investors and securities analysts in their evaluations of companies, Adjusted EBITDA has limitations as an analytical tool, and you should not consider it in isolation or as a substitute for analysis of our results of operations as reported under GAAP. Some of these limitations are:

- Adjusted EBITDA does not reflect our cash expenditures or future requirements for capital expenditures or other contractual commitments;
- Adjusted EBITDA does not reflect changes in, or cash requirements for, our working capital needs;
- Adjusted EBITDA does not reflect interest expense;
- Adjusted EBITDA does not reflect cash requirements for income taxes;
- Adjusted EBITDA does not reflect the stock based compensation component of employee compensation;
- Although depreciation and amortization are non-cash charges, the assets being depreciated or amortized will often have to be replaced in the future, and Adjusted EBITDA does not reflect any cash requirements for these replacements; and
- Other companies in our industry may calculate Adjusted EBITDA or similarly titled measures differently than we do, limiting its usefulness as a comparative measure.

The following table presents a reconciliation of our gross profit under GAAP to Gross Profit (excluding depreciation and amortization).

	Three Months Ended June 30,		Six Months Ended June 30,	
	2014	2013	2014	2013
	(in thousands)			
Gross profit	\$28,073	\$20,414	\$50,127	\$39,382
Depreciation and amortization related to cost of revenue	6,927	4,988	13,395	9,716
Gross Profit (excluding depreciation and amortization)	<u>\$35,000</u>	<u>\$25,402</u>	<u>\$63,522</u>	<u>\$49,098</u>

GAAP defines gross profit as revenue less cost of revenue, and includes in costs of revenue depreciation and amortization expenses related to revenue-generating long-lived and intangible assets. We define Gross Profit (excluding depreciation and amortization) as revenue less cost of revenue (excluding depreciation and amortization). This measure differs from the GAAP definition of gross profit as we do not include the impact of depreciation and amortization expenses related to revenue-generating long-lived and intangible assets which represent non-cash expenses. We use this measure to evaluate operating margins and the effectiveness of cost management.

[Table of Contents](#)

The following table presents a reconciliation of our net income to Adjusted EBITDA.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2014	2013	2014	2013
	(in thousands)			
Net income	\$ 5,748	\$ 4,915	\$ 8,056	\$ 8,690
Interest expense	565	440	1,046	947
Depreciation and amortization	7,280	5,249	14,077	10,218
(Gain) loss on sales of property, plant and equipment, net of retirements	(10)	33	(83)	74
Stock-based compensation	1,195	713	2,343	1,530
Acquisition costs	590	—	2,922	—
Income tax expense	3,438	2,552	6,653	5,064
Adjusted EBITDA (non-GAAP measure)	<u>\$18,806</u>	<u>\$13,902</u>	<u>\$35,014</u>	<u>\$26,523</u>

We evaluate Adjusted EBITDA generated from our operations and operating segments to assess the potential recovery of historical capital expenditures, determine timing and investment levels for growth opportunities, extend commitments of satellite bandwidth cost to expand our offshore production platform and vessel market share, invest in new products and services, expand or open new offices, service centers and SOIL nodes, and assist purchasing synergies.

Adjusted EBITDA increased by \$4.9 million to \$18.8 million for the three months ended June 30, 2014, from \$13.9 million for the three months ended June 30, 2013. Adjusted EBITDA increased by \$8.5 million to \$35.0 million for the six months ended June 30, 2014, from \$26.5 million for the six months ended June 30, 2013. The increase resulted from organic growth in our core offshore operations and, to a lesser extent, results from our acquisition of Inmarsat's Enterprise Energy business unit partially offset by increased compensation associated with headcount additions.

Item 3. Qualitative and Quantitative Disclosures about Market Risk

We are subject to a variety of risks, including foreign currency exchange rate fluctuations relating to foreign operations and certain purchases from foreign vendors. In the normal course of business, we assess these risks and have established policies and procedures to manage our exposure to fluctuations in foreign currency values.

Our objective in managing our exposure to foreign currency exchange rate fluctuations is to reduce the impact of adverse fluctuations in earnings and cash flows associated with foreign currency exchange rates. We do not currently use foreign currency forward contracts to hedge our exposure on firm commitments denominated in foreign currencies, but evaluate this on a continual basis and may put financial instruments in place in the future if deemed necessary. During the six months ended June 30, 2014 and 2013, 24.5% and 40.2%, respectively of our revenues were earned in non-U.S. currencies. At June 30, 2014 and 2013, we had no significant outstanding foreign exchange contracts.

[Table of Contents](#)

Our results of operations and cash flows are subject to fluctuations due to changes in interest rates primarily from our variable interest rate long-term debt. We do not currently use financial instruments to hedge these interest risk exposures, but evaluate this on a continual basis and may put financial instruments in place in the future if deemed necessary. The following analysis reflects the annual impacts of potential changes in our interest rate to net income (loss) attributable to us and our total stockholders' equity based on our outstanding long-term debt on June 30, 2014 and December 31, 2013, assuming those liabilities were outstanding for the previous twelve months:

	<u>June 30,</u> <u>2014</u>	<u>December 31,</u> <u>2013</u>
	(in thousands)	
Effect on Net Income and Equity—Increase/Decrease:		
1% Decrease/increase in rate	\$ 853	\$ 596
2% Decrease/increase in rate	\$1,706	\$ 1,191
3% Decrease/increase in rate	\$2,560	\$ 1,787

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our Chief Executive Officer and our Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures as of June 30, 2014. The term “disclosure controls and procedures,” as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the Exchange Act), means controls and other procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC’s rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the company’s management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives and management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Based on the evaluation of our disclosure controls and procedures as of June 30, 2014, our Chief Executive Officer and Chief Financial Officer concluded that, as of such date, our disclosure controls and procedures were effective at the reasonable assurance level.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting identified in connection with the evaluation required by Rule 13a-15(d) of the Exchange Act that occurred during the quarter ended June 30, 2014 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II – OTHER INFORMATION

Item 1. Legal Proceedings

From time to time, we have been subject to various claims and legal actions in the ordinary course of our business. We are not currently involved in any legal proceeding the ultimate outcome of which, in our judgment based on information currently available, would have a material impact on our business, financial condition or results of operations.

Item 1A. Risk Factors

There have been no material changes from the risk factors disclosed in “Part I, Item 1A. Risk Factors” of our Annual Report on Form 10-K for the year ended December 31, 2013.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

None

Item 3. Defaults Upon Senior Securities

None

Item 4. Mine Safety Disclosures

Not applicable.

Item 5. Other Information

None

Item 6. Exhibits

CERTIFICATION OF
CHIEF EXECUTIVE OFFICER
OF RIGNET, INC.
PURSUANT TO 15 U.S.C. SECTION 7241, AS ADOPTED
PURSUANT TO SECTION 302 OF THE
SARBANES-OXLEY ACT OF 2002

I, Mark Slaughter, certify that:

- a. I have reviewed this Quarterly Report on Form 10-Q of RigNet, Inc. (the "Registrant");
- b. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- c. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the Registrant as of, and for, the periods presented in this report;
- d. The Registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the Registrant and have:
 - a. designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the Registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b. designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c. evaluated the effectiveness of the Registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures as of the end of the period covered by this report based on such evaluation; and
 - d. disclosed in this report any change in the Registrant's internal control over financial reporting that occurred during the Registrant's most recent fiscal quarter (the Registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the Registrant's internal control over financial reporting; and
- e. The Registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the Registrant's auditors and the audit committee of the Registrant's Board of Directors (or persons performing the equivalent functions):
 - a. all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the Registrant's ability to record, process, summarize and report financial information; and
 - b. any fraud, whether or not material, that involves management or other employees who have a significant role in the Registrant's internal control over financial reporting.
